Physician Outpatient Billing Codes

Clinicians and outpatient facilities use Current Procedural Terminology (CPT¹) codes to bill for procedures and services. Each CPT code is assigned unique relative value units (RVUs), which are used to determine payment by the Centers for Medicare & Medicaid Services (CMS). Some commonly billed CPT codes used to describe procedures related to Edwards Lifesciences' Vascular technologies (e.g., Fogarty catheters) are listed below.² This list may not be comprehensive or complete. These procedures may be subject to the CMS multiple procedure payment reduction rule. When applicable, a payment reduction of 50% is applied to all payment amounts except the procedure with the greatest RVUs, which is paid at 100% unless exempt by CPT instructions or payer policy. This rule does not normally apply to radiologic procedures.

Procedures related to the use of Edwards Lifesciences' technologies (e.g., Fogarty catheters) are often performed in a facility setting, including an outpatient hospital department (HOPD, Place of Service (POS) code 19 or 22), Ambulatory Surgery Center (ASC, POS code 24), or a Vascular Access Center (which can be licensed as POS 11, 22, or 24). Reimbursement is determined based upon services rendered and varies by POS. The following are commonly billed codes and associated national average Medicare payment amounts. This list may not be comprehensive and complete.

Revenue Codes¹³ and HCPCS Codes

Revenue codes help hospitals categorize services provided by revenue center. Medicare utilizes revenue codes for cost reporting purposes. It may be appropriate for hospitals to capture the cost of products used for these procedures for payer reporting or cost accounting purposes as expenses within Revenue Code 0278 (Medical/Surgical Supply – Other Implants) on the hospital UB-04 billing form. CMS uses C-codes under the Outpatient Prospective Payment System (OPPS) to track device cost information for future APC rate-setting purposes. No additional facility payment is associated with these codes. CMS may reject hospital claims if the appropriate C codes used to report device costs are not identified on the claim. Edwards Lifesciences' Vascular technologies can be used in both the inpatient and outpatient setting. C codes which may apply to the use of these products in the outpatient setting are listed below. Procedure codes associated with these products are not necessarily included within this document.

Inpatient Hospital Billing Codes

Medicare inpatient hospital reimbursement is based upon the Medicare Severity Diagnostic-Related Group (MS-DRG) classification system, which assigns MS-DRGs based on ICD-10 diagnosis and procedure codes. The compliance date for mandatory use of ICD-10 codes was October 1, 2015.¹⁴

The provider is responsible for selecting the most appropriate code(s) for the patient's clinical presentation. When radiologic guidance is used for catheter placement, it may be appropriate to add applicable codes according to the service provided following correct coding guidelines. Services that are considered a component of another procedure may not always be coded and billed separately.
3. Where applicable, a physician may be required to report CPT codes for radiological supervision and interpretation with CPT codes for interventional procedures. The use of modifier-26 may be required with various radiological supervision and interpretation CPT codes unless radiological equipment is owned by the physician performing these services. Radiological services are often packaged and do not qualify for separate payment by Medicare when performed in conjunction with interventional procedures. Consult with coding and billing staff, as well as payer policy for further guidance.
4. For all Medicare payments for physician, hospital outpatient, and ASC services, the multiple procedure reduction rule may apply. Consult with coding and billing staff, and payer policy for further guidance. National average is based on factors such as geography, teaching vs. non-teaching hospital, rural vs. urban area, etc. and your payment may be different based on these factors. This payment will differ for commercial payers. Payments are effective January 1, 2019 through December 31, 2019.
