Edwards ThruPort Systems
EndoVent Pulmonary Catheter Kit

Product Overview

The EndoVent pulmonary catheter is indicated for use in patients undergoing cardiopulmonary bypass. It is intended to remove blood from the pulmonary artery, assist in decompressing the heart, maintain a dry operative field and monitor pulmonary artery pressure.

- Double lumen, 8.3 Fr catheter
- 5 cm interval markings to assist with placement
- It is pre-shaped and flexible to facilitate percutaneous placement through the internal jugular vein or the subclavian vein
- Integrated balloon to flow-direct the catheter into the pulmonary artery
- Protected by a contamination guard
- 3-way stopcock allows for pulmonary artery pressure monitoring
